

- **Compaction of all products in cartons, pallets and big bags**
- **Separates and eliminates product-lumps**
- **Compaction of concrete and refractories**
- **Vibration tests of materials and shipments**
- **Electric and pneumatic driven vibration tables**
- **Pneumatic lifting action is build in**
- **Can be supplied with frequency control from 10 to 200 Hz**
- **Customized design for any purpose**

Vibration Tables for Roller Conveyors

- Pneumatic Vibration table for loosening excess metal from 30 Kg. castings for cylinder heads
- Vibrating ribs is pneumatic lifted up between the rollers
- Supplied with a pneumatic control that is integrated with the customers control unit

- Pneumatic vibration table integrated with a roller conveyor for compaction of carton boxes with plastic parts
- Ribs will be pneumatic lifted up between the rollers and vibrate the box
- Supplied with fully electric and pneumatic control

Vibration Tables for Roller Conveyors

- Electric vibration table for compaction of 350 Kg. drums of construction materials
- Vibrating ribs is pneumatic lifted up between the rollers
- Supplied with a pneumatic and electric control that is integrated with the customers control unit

- Pneumatic stainless steel vibration table for compaction of 400 Kg. Pharmaceuticals in drums
- Vibrating ribs is pneumatic lifted up between the rollers
- Supplied with a pneumatic control that is integrated with the roller conveyors control unit

Vibration Tables for Roller Conveyors

- Pneumatic vibration table for compaction of 150 Kg. pine powder in barrels
- Vibrating ribs is pneumatic lifted up between the rollers
- Supplied with a pneumatic control that is integrated with the roller conveyors control unit

- Electric stainless steel vibration table for compaction of 500 Kg. powder in drums
- Vibrating ribs is pneumatic lifted up between the rollers
- Supplied with a pneumatic control that is integrated with the roller conveyors control unit
