

- Gentle conveying of all products
- Electric or pneumatic driven conveyors
- Easy and fast cleaning
- No mechanical parts in contact with products
- No risks for product-clamping or trapping
- Separation or sieving can be integrated
- Can be supplied with a control or integrated with customers control
- Customized sizes and solutions

- Pneumatic stainless steel vibration conveyor
- Visual inspection for packaging of frozen vegetables
- Supplied with a frame and pneumatic control
- Mounted with Polycarbonat cover for protection
- Supplied with stainless steel springs

- Pneumatic stainless steel vibration conveyor
- For dosing frozen meat to a multi-head weighing unit
- Can handle big loads with a very hygienic design
- Precise step-dosing with integrated control

- Electric stainless steel vibration conveyor with sieve
- For draining water from washed fresh vegetables
- Hygienic design for easy cleaning and inspection
- Mounted with two electric NEG vibrators
- Electric control with NFU frequency control

Vibrating Conveyor Systems

- Electric stainless steel vibration conveyor with sieve
- Designed for separation of pharmaceuticals
- Complete enclosed hygienic system
- Efficient elimination of lumps and particles
- Easy and fast batch cleaning
- Supplied with stainless steel frame and springs

- Electric stainless steel vibration conveyor
- 9 meter long conveyor for construction products
- Mounted with very efficient blade-springs
- Driven by two powerful electric NEG vibrators

- Pneumatic stainless steel vibration conveyor
- Designed for dosing and diversification of pinewood seeds
- Build in hopper
- Integrated with a vision system and robot-picker

- Pneumatic stainless steel vibration conveyor
- 3 meter long and hanging conveyor
- Designed for transport of plastic parts
- Build in a frame with wheels
- Very low height
